1. CLAIM AMENDMENTS

Please amend the claims as follows:

What is claimed is:

- 1. (currently amended) A method for enhancing the function of normal or abnormal excitable tissue in a mammal comprising administering peripherally to said mammal a peripherally effective, non-toxic, excitable tissue enhancing amount of an recombinant EPO, an EPO receptor activity modulator, an EPO activated receptor modulator, or combination thereof.
- 2. (original) The method of Claim 1 wherein said enhancing the function of excitable tissue results in the enhancement of associative learning or memory.
- 3. (original) The method of Claim 1 wherein said enhancing the function of excitable tissue is used in the treatment of cognitive dysfunction.
- 4. (currently amended) The method of Claim 1 wherein said excitable tissue is central nervous system tissue or peripheral nervous system tissue.
- 5. (currently amended) The method of Claim 1 wherein said administration comprises oral, topical, intraluminal or by inhalation or parenteral administration.
- 6. (original) The method of Claim 5 wherein said parenteral administration is intravenous.
- 7. (currently amended) The method of Claim 1 wherein said administration is acute or chronic.
 - 8. (cancelled)
- 9. (original) The method of Claim 1 wherein said EPO is administered at a dose greater than the dose necessary to maximally stimulate erythropoiesis.
 - 10. (cancelled)
 - 11. (cancelled)
